

Obligatory scheme for basic research

Obligatory scheme length is limited to 20 pages

| | |
|-----------------------------|--|
| Project title | |
| Principal investigator | |
| Applicant organisation | |
| Statutory representative(s) | |

1. Timeliness and the scientific nature of aims and objectives, the scientific level and the quality of the project

- Specify the timeliness of the problem solved in the respective field of science and technology from the worldwide point of view including the relevant references to the specialised publications
- Specify the scientific level of the project and the scientific nature of the methodologies used during the project implementation
- Specify the project aims and objectives and the feasibility of your aims and objectives
- Describe the suggested methodology for the project implementation, justify its selection and effectiveness of its use with a view to meeting the declared aims and objectives

Free text:

2. Original character of the project and conceptions of the project implementation

- Specify the originality of the project
- Describe the suggested conceptions of the project implementation and formulate the scientific hypothesis
- Specify the importance of preliminary results, relation of the suggested solution and own published results

Free text:

↓↓↓

3. The structure of the project, the quality of preparation, the logical interconnection of the project procedures

- Specify the timetable for the project implementation taking into account the logical interconnection of the procedures and meeting the declared aims and objectives
- Explain the adequacy of the used methodology
- Explain the adequacy of the proposed project budget according to financial demands of accomplishing project goals
- Provide the timetable of the project implementation and for achieving the set aims and objectives

5. Professional qualifications of the research team

- Describe the competence of the participating research organisations with regard to the submitted project according to the main role each organisation implements in the project
- Describe the competence of individual researchers for the solution of the submitted project and fundamental tasks during the project implementation; (this does not concern the project manager)
- Describe the manner of co-operation of researchers and their mutual complementarity and substitutability during the project implementation
- Describe instruments, equipment and personnel infrastructure of the workplaces participating in the project implementation
- Describe the level of engagement of young researchers up to 35 years including postgraduate students from the respective field of research and development in the project implementation
